

Let them grow.
Arouse curiosity.

Encouraging children to be children, letting them test, discover and ask questions. This is an art in itself, which requires knowledge, experience and the right approach.

The preschool activities run by Trollhättans Stad have the common aim to give our youngest inhabitants a secure, happy and interesting day-to-day life. Every year we welcome around 550 new children to our activities for 1-5 year olds around the municipality.

All children have their own thoughts, their unique background and their individual needs. They should all have the opportunity to grow and feel they are fantastic. Just the way they are.
